Clarifications

- Where EFT = the state Energy Transition Fund
- Under **Business Tariff myBusiness4All+**, the charge for the energy consumed (€ per kWh) remains fixed, regardless of the level of consumption. If the meter reading concerns a period other than 30 days, then the capacity charge and the fixed fee are calculated proportionally, using the coefficient A = billing days of /30 days
- In case the metering installation does not include a maximum demand meter, the minimum capacity charge shall apply
- Based on the legislative framework as in force, PPC along with the electricity bills also collects various duties and taxes [VAT, Excise Duty (ΕΦΚ) and Special Duty 5%] and fees payable to third parties [Municipal Duties (ΔΤ), Municipal Taxes (ΔΦ), ERT fee (the Hellenic Broadcasting Corporation), Real Estate Municipal Duty (ΤΑΠ)], as required by the State
- More information on the PPC's discount policy (where applicable) can be found at www.dei.gr
